and recycling industry covers :

- Rotor and stator knives
- Granulator knives
- Pressure lips
- Wear parts
- Pelletizer knives
- Shredder knives

Ravne knives for plastics and recycling industry - the correct approach to earth's resources

Can you imagine life without plastics?

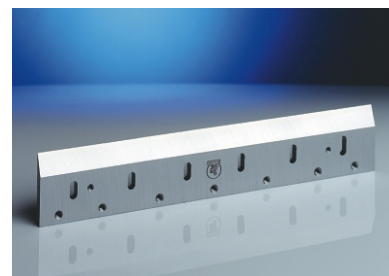

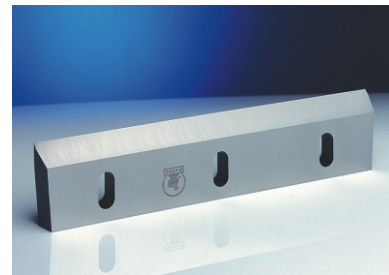

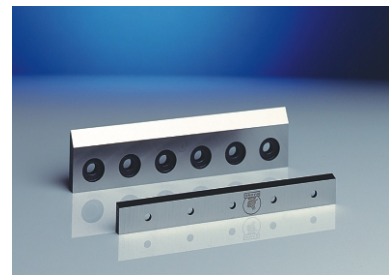

Since many years this material has been a part of our daily life!
Today the correct approach to earth's resources is also of great
importance. Recycling is our future!

At Ravne we are aware of that and thus started production of knives
for plastics and recycling industry years ago.

Ravne knives for plastics and recycling industry are made of the
finest high alloyed tool steels and provide a starting position for our
production. The combination with the knowledge of customer's
processing equipment, precise machining, which guarantees
closest tolerances and special heat treatment for obtaining high
wear resistance and toughness insure a first class knife for each
application.

We produce granulating and pelletizing knives for recycling of
plastics and other different materials (cable, electronic scrap,
tires, synthetic waste ...).

Remember: Each machine is only as good as the knife
used!

Additionally we offer our customers:

Ravne knives for rubber industry
Ravne knives for leather industry
Ravne ice planing knives

Ravne knives for rubber industry - go for them

The correct choice and processing of materials allow the knives to keep their superior properties also under high temperatures. This refers to hardness ranging between 58 HRC and 61 HRC and to special characteristics preventing rubber sticking on the knife surface.

Ravne knives for leather industry - for extreme conditions

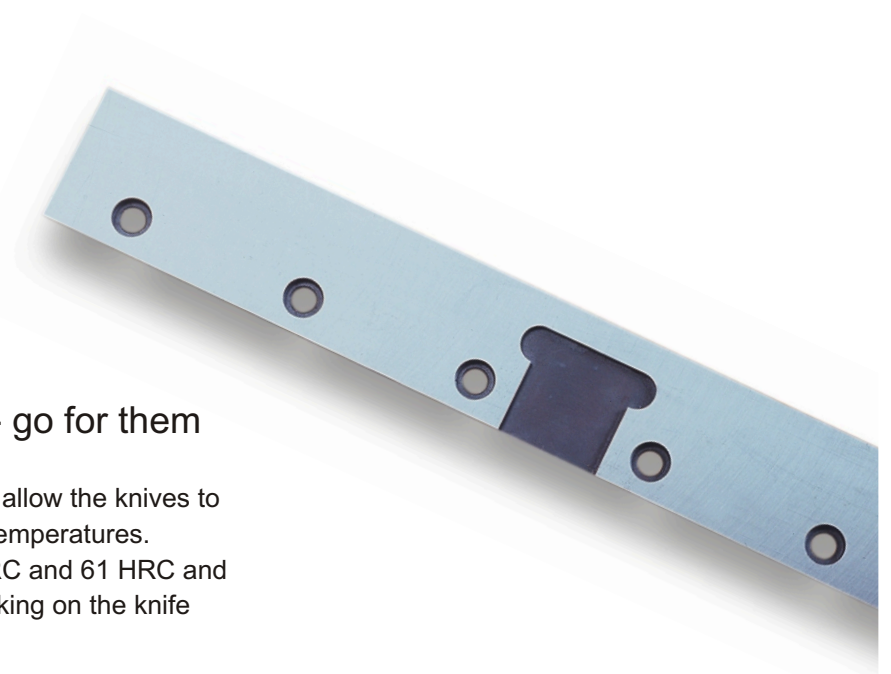

Ravne knives for leather industry are distinguished by high durability of the cutting edge, which allows performance under extreme conditions.

All knives for leather industry are made of our best high alloyed tool steels and achieve hardness between 60 HRC and 65 HRC.

Ravne ice planing knives - suitable for special demands

Ravne ice planing knives are made of standard inlaid steel. They can be easily re-sharpened and used for all sport installations.

Ravne ice planing knives are known for its robustness and toughness. Try them!
